first impression

about us

Lancashire Double Glazing maintain the same values today as we did when we first started...over 30 years ago!

Now based in Preston on a 4 acre site, with 6 factories and covering the whole North West, Lancashire Double Glazing is today one of, or not the largest home improvement companies with over 1 million frames manufactured and installed.

With over 75,000 guarantees issued its no exaggeration to say that we are probably a household name across the North West with the popularity of our windows, doors porches and conservatories.

Composite Doors

Behind the scientific-sounding name, you'll find the latest technology and design in doors. And when you're indoors, you'll enjoy style, strength and security. We like to keep our technicians busy...and you safe. So we've tested our doors to the very limit. Against extreme weather, attack and over enthusiastic visitors. And wannabe burglars are going to hate all those high-tech security features.

So Good to Come Home to

Your front door is the most noticeable, the most striking feature of your house. So naturally, you want it not only to look great, but also to blend in with the overall ambience of your home.

making the perfect entrance

Our LDG door systems, although looking like traditional timber doors, are manufactured using a high-quality, precision-engineered, composite door slab, to create a finished door which will last the test of time and looks stunning.

All our doors are custom made and you can choose from a range of 7 colours, 9 glazing configurations and 12 glass ranges creating literally thousands of possible permutations and allowing our customers to have a unique door set.

Our doors are manufactured from 2mm through compression moulded Glass Reinforced Polymer (GRP) which is bonded to a composite frame and filled with an environmentally-friendly, CFC- Free Polyurethane foam core. The door is then trimmed to exact size and fitted into a maintenance free PVCu frame. All our doors have high security multi-point locks as standard and we offer a wide variety of Glazing and Door Furniture options to allow you to personalise your new door.

Traditional Look

We offer a range of traditional door styles to suit most tastes. The high-definition embossing of the GRP skins give a real wood look and mouldings give the feel of a traditional timber door.

Maintenance Free

The 2mm through-coloured GRP skin comes with a 10 year surface finish warranty. The construction of the door and the materials used ensure that the door will not warp, crack or twist like traditional timber doors and are backed by a 10 year warranty. All our glazing and door furniture comes with a 10 year manufacturer's backed warranty.

High Security

Our doors are manufactured from high-impact resistant materials to offer high levels of security. All doors come with multi-point locking systems as standard and we offer optional security chains for extra peace of mind. The door slab used has been tested to the rigorous PAS 023/024 standards for weather tightness and enhanced security.

Energy Efficient

All Glazing is a minimum double glazed and the Zinc Art products are triple glazed for extra efficiency. The Polyurethane core gives excellent heat insulation and the door offers more insulation than either PVCu or Timber doors. With our PVCu outer frame and precision manufacturing specifications, we can guarantee a tight seal between frame and door to ensure no draughts or heat loss.
